

Sprint #5	Mutant basic AI
Date start	12/10/09
Date end	25/10/09

S#	Story	Task title	Task description
9	Mutant attacking	Mutant movement	Implement an algorithm for movements that take account of collisions and sea level. For the moment, only a basic algorithm is implemented, no node network.
9	Mutant attacking	Mutant attack	Implement basic attack and damage to the player and the shaft mining
9	Mutant attacking	Mutant target selection	Implement a basic AI with: - prowling - attack of the mine shaft - attack of the player - retreat to the acid sea when too much wounded.
	Technical-story + small tasks		- Adapt the mine shaft for mutant attack - Rewrite ApplyDamage functions - Create a small mission - Add ammo management to the player's weapon - Add score (ore extracted / mine shaft damage)

Remaining hours per task								
#0	#1	#2	#3	#4				
7	4	2	1	1	1	1	1	1
3	3	3	1	0	0	0	0	0
10	10	10	10	9	7	5	3	

Hours spend per task									
#1	#2	#3	#4					Total	
4	4	2	1					11	
		1	1					2	
			1	2	1	1		5	
		1	2	2	2			7	
Total	4	4	4	3	4	3	3	0	25

Remaining hours	20	17	15	12	10	8	6	4
-----------------	----	----	----	----	----	---	---	---

Cumulative hours spent	0	4	8	12	15	19	22	25	25
------------------------	---	---	---	----	----	----	----	----	----

Each session takes place during spare time, on evening for 1 to 4 hours or during week-end for up to an entire day.
